Education

Princeton University, Princeton, New Jersey (A. B., 1957)
Stanford University, Stanford, California (M. S., 1959; Ph. D., physics, 1965)

Professional Positions

Teaching Assistant/Research Assistant, Stanford University (1957-64)
Research Assistant, Brookhaven National Laboratory (summer, 1958)
Research Associate, The Ohio State University (1964-66)
Visiting Researcher, State University of New York at Stony Brook (fall, 1968)
Faculty Member, The Ohio State University: Assistant Professor (1966-69); Associate Professor (1969-1975); Professor of Physics (1975-87)
Research Physicist, Centre de Recherches Nucléaires,
Université Louis Pasteur, Strasbourg, France (1972-73)
Chairperson, Department of Physics, The Ohio State University (1980-86)
Dean of Graduate Studies and Research, Clark University (1987-93)
Professor of Physics, Clark University (1987- 2010)
Adjunct Professor of Education, Clark University (1993-95)
Visiting Scholar, Stanford University (summer and fall, 1994)
Professor of Physics and Education, Clark University (1995- 2010)
Chair of Physics Department, Clark University (1998-2002, 2006-2007)

Teaching

Teaching at Clark:

- *Discovering Physics*: together with Mauri and Harvey Gould, developed, presented, and designed evaluation for this non-science-majors course, using easily accessible phenomena and a small-group learning environment. (First offered in 1989.)
- *Astronomy/Exploring the Universe*: began teaching one semester each year starting in 1998; background in nuclear astrophysics helps bring research into the classroom.
- *Quantum Leaps*: treated the major themes of 20th-century physics within the broader sweep of contemporary civilization. (Offered through COPACE, 1992)
- *Energy and the Environment*: provides a background in the physics principles governing the application and transformations of energy, energy sources and resources, and investigates environmental problems where energy considerations play a central role. (First offered in 1994.) A “hands-on” version, *Energy and the Campus*, was offered for several years in collaboration with Chris Hohenemser; for this course, the Clark campus serves as an environmental laboratory.
- *Science and Society*: jointly taught with Jim Gee of the Education Department; explores the language of science and the relationships between science and its social context. (First offered in 1994.) A modified version was offered as a First-Year Seminar in AY 2005-06.

- *Ways of Knowing in the Physical and Natural Sciences* (co-taught with Marion Guerra, of the Goddard School for Science and Technology). The pilot and now continuing offering in the “Ways of Knowing” education series, combining science process and knowledge with a variety of methodological approaches.
- *Modern Physics/Quantum Physics Laboratory*. Class sessions are built on a lecture-discussion format, and the associated labs are conducted in a modified “small-group” approach similar to that of *Discovering Physics*.
- *Seeing the Light: At the Crossroads of Art and Science*. This course was especially designed for May Term in Luxembourg. “Seeing the Light” offers hands-on activities in a variety of areas including the physics of light, visual perception, and rudiments of artists’ techniques in perspective, light and shadow, and color mixing. It was offered in 2005, 2007, 2009, and will be, again, in 20011.

Courses taught at Ohio State ranged from introductory-level physics for science and engineering students (including honors sections) and physics for non-science students (including designing and setting up complete lecture demos and laboratory on satellite campus) through advanced undergraduate courses (modern physics, advanced laboratory) and graduate-level nuclear physics, research orientation for new graduate students, and teaching orientation for new teaching assistants

Service

CLARK UNIVERSITY:

- Planning and Budget Review Committee, Admissions and Financial Aid Committee
- Task Force for a University Park secondary school (collaboration of Clark with Worcester Public Schools); currently member of Program Committee for UPCS.
- Professional Development Schools steering committee (Education Department and Worcester Public Schools)
- Steering committee of the Environmental School.
- Panel participant and discussion group leader for first-year-students academic orientation program for three years; 1998, discussion leader for parents’ orientation.
- Physics Department chair, 1998-2002, and 2006-present.
- Secretary of the Faculty, 2000-2003.
- Undergraduate Academic Board 2005-2007

COMMUNITY:

- HEART (Help Educate And Renew Trust), a partnership between Temple Sinai and Emmanuel Baptist Church; after-school academic enrichment program. Founding member, serving on the steering committee and as program science teacher (1994 - 2002).
- Member of draft reading group for the Massachusetts Mathematics and Science & Technology Curriculum Frameworks (1993 - 96), of Select Task Force for teacher education requirements in science and mathematics (1995 - 97), and of the State Teacher Test in Science and Mathematics evaluation group, October, 2003.
- Member of Science task force for Worcester Public Schools, sponsored by the Worcester Alliance for Education (1993 - 1995).
- Ecotarium: Program Committee, (1989 - 2000); Corporator, 1997-2001.

- Member of the Board of Dynamy, Inc., 1995-2008; chair of the education committee, 1996-97, vice-president, 1997-98, president 1998-2000. Dynamy is a non-profit organization providing alternative and bridging academic experiences for young people during high school and at the high-school-to-college interface.
- Science education workshops and presentations for teachers, past 12 years.

Honors and Awards

- *John W. Lund Community Achievement Award*, August, 1997. This is an annual award recognizing contributions to the Worcester community by members of the Clark University community. I was honored to be the first faculty member to be selected for this award.
- *Robert H. Goddard Service Award*, March, 1998. This honor was presented to me by students and teachers of the Goddard School of Science and Technology, in recognition of my work over the previous seven years with the Goddard teachers in workshops, Ways of Knowing classes, and special programs.

Selected Accomplishments as Dean at Clark

- Established Graduate Student Council. Initiated annual grad student orientation program and Teaching Assistant workshops. Took lead role in review of all Clark graduate programs. Graduate enrollment increased by over 25% in 5-year period.
- Created incentive policy to encourage grant proposals and inclusion of more support for students on grants, the latter increasing by over 200% in 5 years. The number of externally-supported projects increased by over 60% and the number of participating faculty by over 50% in same 5-year period.
- Developed the University's first intellectual property policies.

Selected Achievements as Ohio State Physics Department Chair

- Revitalized department, adding junior faculty who earned three Sloan fellowships, one NSF Presidential Young Investigator Award, one NRL Young Investigator Award, and three DOE Outstanding Junior Investigator Awards, and senior faculty including a former Principal Scientist at Xerox Webster Research Center and a senior astrophysicist at Bartol Research Institute.
- Added undergraduate honors courses, seminar courses in current areas of physics research, and an interdisciplinary course in Science, Technology, and Human Values.
- Wrote proposals which produced significant honors and awards for the department: "Center of Excellence" designation by University administration; "Academic Challenge" award of \$270,000 from state of Ohio; award of \$500,000 grant toward establishment of an "Ohio Eminent Scholar" endowed chair, from the state Board of Regents.

Research

- Proposed and co-directed an extensive nuclear physics program at Ohio State, with continuous support from the National Science Foundation from 1966 to 1988, with grants totaling over \$5 million.
- Research advising: 7 students to M.S. degree, 14 to the Ph.D. (See second section, p. 18)

- At Clark, created and offering a variety of courses and workshops based on research findings in science education. The target audience is primarily non-science students (especially pre-service and in-service teachers). I am currently advising one graduate student in an Individually Designed Ph.D. program in this field; a former student graduated received the Ph.D. in 2001. Grants in science education are listed on page 5 of this *c. v.*
