

1) It's not that meaningful because just working with numbers sitting there doing nothing is boring. I still do it but math doesn't interest me much because just doing nothing no talking just answering a question is not that fun like in my future I rather go to concerts getting lit rapping about life in front of a huge crowd.

2) You can be nicer and you can do funner stuff. Also you can stop timer. you should put our music.

3) We can behave more and pay attention.

1. Yes it is meaningful to me because I get to learn some extra math that also means I get extra practice for math since I have math and numeracy for math.

2. Explain each thing we're learning in a more understanding way and to give better examples so that everyone can understand or you can make an example for each type of people.

3. Me and my classmates can pay more attention and listen when you tell us to do something and tell you when we don't understand something.

January 23, 2016

1. This class is not. I am not trying to be rude but the reason why is because this is our last year in middle and I want to do things that are fun and even though we have some trouble-makers the whole class shouldn't get in trouble for it.
2. Do things that we like also the TIMER I'm sorry to say that thing is really annoying plus again if other people are quiet then you should have a piece of paper of people talking and put it on them so in the end when you wrote all the people down they would have to stay so it will be fair.
3. Stop fooling around and ruin everything, do what we have to do so we can get some free time.

Love and Care ♡

1) This class is a bit important to me because it teaches me how to do many things to help me with money.

2) She can do different fun activities and like the winner gets a hw pass or a chocolate or something.

3) me and my class mates can not talk that much and participate more.

- Yes because that help me to know math and I know that in my life I will need to do some math to help me to better understand that obstacle that I will need do some math.

- What ms. Cramer can do its nothing because no-one its perfect and I know she do the best for us and I think that it us that we need to change our behavior on class and like that were going to better understand what the class to talks about our the teacher

- We need to behive on class pay attention try to stop messing around and get our work done.

① This class is worthwhile you can learn a lot in this class However theres just a boring way we have to learn which really bothers.

② ~~We should~~ ms. Cramer could make it a more better by watching ~~movies~~ on math. doing more fun activities videos oh! and mindfulness no more boring music I command.

1) I think that we should do fun things in class and do things that other people like to do in class and have a good time.

2.) You need to make class more fun and make ~~the~~ class better and bring food if you want you do not have to do it if you do not want to.

3) me and class mates can make the class fun ~~to~~ by ~~to~~ doing there work.
